

Aadi Patwardhan

Final Year BSc Computer Science & Engineering (Honours) – TU Delft
AI Engineering — Quantum Computing
LinkedIn | GitHub | aadikpat@gmail.com

EDUCATION

Delft University of Technology (TU Delft)	2026
BSc (Hons) Computer Science & Engineering, CGPA: 8.6/10	
– Track: Data & AI — Minor: Quantum Science & Quantum Information	
Amsterdam International Community School	2023
IB Diploma: 41/45	HL: Mathematics AA, Physics, Chemistry (7/7)

EXPERIENCE

Deal Analytics Software Intern	Mar 2025 – Jun 2025
PricewaterhouseCoopers (PwC)	
– Architected and deployed a full-stack deal analytics platform replacing manual PVA workflows, achieving 4x faster financial analysis. – Built backend automation of financial data processing in Python Django and PostgreSQL; integrated and deployed with Docker containerization on internal pwc deals platforms. – Developed interactive views tailored for M&A insights (React + TypeScript). – Collaborated cross-functionally with finance and valuation teams to deliver scalable technical solutions from evolving business requirements in an agile environment. – Conducted several stages of user testing across levels and teams in the Deals organization. – Prototyped AI-assisted automation tools to streamline deal analysis.	
Research Assistant – Infini Data Lab (WIS)	Sep 2024 – Present
TU Delft	
– Conducting honours research on efficient simulation of quantum computation systems, focusing on scalability and optimization through learning based methods. – Developing AI-assisted techniques for enabling quantum computation. – Implementing high-performance simulation pipelines in Python/Qiskit for large-scale quantum systems. – Research at the intersection of machine learning, quantum information theory, and computational complexity.	

PROJECTS & LEADERSHIP

- IBM Quantum – Qiskit Fall Fest Mentor: Organized TU Delft's first IBM Quantum event; mentored students on quantum circuit design.
- Jane Street x Junction Hackathon (2025): TU Delft Challenge Runner-Up.
- HackDelft (2024): Top 3 nomination for CH Challenge.
- DARE Aerospace – CanSat Competition: Software & hardware engineer; Top 10 nationwide for 3 consecutive years.

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript/TypeScript, Scala, SQL, Assembly
ML/AI: PyTorch, TensorFlow, Keras, LangChain
Quantum: Qiskit
Backend/Systems: Django, SpringBoot, Apache Spark, PostgreSQL, Docker
Frontend: ReactJS

ADDITIONAL

- Passionate about DSA problem solving daily, Solved 500+ LeetCode problems.
- FIDE Chess Rating: 1773.
- Dutch National U16 & U18 Cricket Team; #1 U17 bowler in Netherlands (2022).
